

## BEMER Physical Vascular Therapy - Sleep yourself healthy

In winter, colds take their toll on our body and immune system. For optimal regeneration of organs and health you need an undisturbed and deep sleep phase. BEMER's special sleep program promotes healthy sleep and assists your bodily repair and regeneration processes.

### Human sleep function

35% of Americans suffer from sleeping problems. Sleep is a basic requirement without which we become ill according to expert opinion. Sleep ensures important functions of physical and mental repair in two phases. In the first phase, the deep sleep phase, our immune system works at full speed, and the brain releases growth hormones and builds new cells. In the second phase, the REM or dream phase, our brain works more than in the waking state, and we dream intensely and process the day we have just gone through.

Latest research results have shown that during the night there is a redistribution of the blood in the body and the immunological processes that take place during sleep are much more important than we thought until now. Microcirculation is the most important part of the human circulation system and fulfils a vital transport function of metabolic waste deacidification during sleep.

### BEMER revolutionary sleep program

The BEMER sleep program can help you to fall asleep and sleep through the night and supports important processes of regeneration during periods of rest. BEMER has developed a special signal configuration for sleep in addition to the day therapies. This therapy improves the stimulation of regenerative processes and ensures an improved deacidification of the body.

The sleep program is not only positive for a wide selection of the population but in particular for older persons or those more susceptible to infections. BEMER Physical Vascular Therapy provides the cells, tissues and organs with oxygen and nutrients and removes the metabolic waste products.

**Test BEMER Physical Vascular Therapy.** Two, eight minute sessions per day can open up your microcirculation by 30%.

From the day you are born blood flow supports all healthy cell function. It is the foundation for living life to its fullest. Without it your cells suffer and this can lead to all sorts of disorders as you age.

**Would you like to improve in your health?**

With regular BEMER Physical Vascular Therapy use, inflammation can be reduced, the immune system is strengthened, and you feel less aches and pains, sleep better and have a lot more energy.

### **BEMER Physical Vascular Therapy**

The core of BEMER technology is a physical electro- magnetic signal that stimulates *microcirculation* to enhance blood flow to smallest capillaries (vasomotion). It moves more nutrients, water and oxygen **in** and metabolic waste **out** of tissue and organs. BEMER uses copper coils to transport a weak pulsating bio-rhythmical signal to stimulate vasomotion. The therapy devices are medically certified and their effect is scientifically documented and is widely recognised.

### **Federal Drug Administration Approval**

BEMER Physical Vascular Therapy is a Food and Drug Administration Registered Class I Medical Device. This ground breaking innovation in alternative medicine has been used for over 16 years in Europe with proven effectiveness and safety. BEMER (Bio Electro Magnetic Energy Regulation) is the only pulsed electromagnetic field (PEMF) device in the United States that has been approved to conduct research on human subjects. NASA is placing BEMER technology in space suits. BEMER is the most researched low-level pulsed electromagnetic field device in the world.

### **Test BEMER Physical Vascular Therapy**

The two equipment sets **BEMER Classic** and **BEMER Pro** are easy to operate and designed for use in clinics and practices as well as, for private use in the home. The application is incredibly simple and comfortable. **Two, eight minute sessions per day** can open up your microcirculation by 30%.

Please take a bit of time to learn about and try BEMER Physical Vascular Therapy. You don't need to believe in it to try it. You will observe for yourself the wonderful effects it has on your body.

Questions about the use and effectiveness are welcomed.

### **About BEMER**

The first BEMER Physical Vascular Therapy system was launched onto the market on 1998; it was developed further and relaunched in 2007 with an improved signal. Since December 1998 we have collected over 5000 testimonials and letters from users all over the world whom the BEMER system has verifiably helped. BEMER Physical Vascular Therapy represents a ground breaking innovation for modern medicine.

The BEMER Int. AG was formed as Innomed Int. AG, and in 2010 was renamed accordingly. The company's headquarters are in Triesen, Liechtenstein, with 60 employees. BEMER America is located in San Diego CA. BEMER AG operates in the medical engineering sector and develops physical therapy methods to positively influence microcirculation.
